

FUTORY CARDS

Developer Plan & Implementation Spec

Last updated: 2026-05-28 | For AI agents and developers — read before touching code.

1. Project Overview

Field	Value
Creator	Simon Allmer / Simon Allmer Entertainment
Stack	Vanilla HTML + CSS + JavaScript (no framework, no build step)
Entry point	index.html — single-page app, GitHub Pages
Mode	Pass-and-play (2–4 players share one device)
Current focus	Unity (set 1) — full digital implementation
Duality (set 2)	Design complete, balancing ongoing, no images yet
Trinity (set 3)	Planned 2028, placeholder only

2. Game Overview

Futory Cards is a deck-building card game. Three sets can be combined. Win condition: last player with Time Points. A player is eliminated when both Day Die and Night Die reach 0.

3. Card Types

Type	Played to	Bazaar copies
Steam	Hand	10
Landmark	Landmark Zone (permanent)	3
Creature	Creature Zone → History after combat	Rarity-based
Artifact	History Pile (used reactively)	Rarity-based
Spark	Abyss (one-time use)	6
Destiny	Destiny Abyss or Destiny Zone (if persistent)	1

4. Core Mechanics

4.1 Time Points

Day Die (orange, 12) + Night Die (blue, 12) = 24 starting TP. Damage drains Day first. A die at 0 cannot be recovered. Both at 0 = elimination.

4.2 Steam Currency

Steam	Symbol	Bazaar cost	Notes
FireSteam	F	Free	Only free card in the game
GoldSteam	G	AAA (3 any Steam)	
LaserSteam	L	FGG (1 Fire + 2 Gold)	
AllSteam	A	N/A	Any Steam counts as A when paying costs

Limit: 1 Steam purchase per turn. Cannot buy Fire then use it to buy Gold/Laser same turn.

4.3 Turn Structure

Phase	Name	Key Actions
-------	------	-------------

0	Steam	Take 1 Steam from Bazaar, OR skip (→ draw 3 in End Phase + FoY bonus)
1	Construction	Play Landmarks/Artifacts/Sparks from hand; purchase non-Steam from Bazaar
2	Creature	Summon Creatures; attack with Creatures (summoning sickness applies)
3	End	Draw 2 cards (3 if skipped Steam); discard to hand limit (default 5)

4.4 Starting Deck

5× FireSteam + 2× GoldSteam + 1× Ichor, shuffled. Deal 3 cards to each player at game start.

4.5 Combat

Attacker selects creature → (3-4P: pick target) → Defender chooses: block with one creature / play Artifact / take direct damage. Combat: Attacker HP vs Blocker HP. Attacker > Blocker = blocker destroyed + spillover damage to defender TP. Attacker < Blocker = attacker destroyed, blocker takes that much damage and survives. Equal = both destroyed. **Attacker ALWAYS goes to History after combat** — intentional one-use-per-attack design.

4.6 Destiny Cards

Triggered at the very start of a player's turn when Future Pile = 0 (before any phases, including shuffle-on-draw). Most resolve instantly → Destiny Abyss. Semi-permanent: placed on Bazaar pile. Permanent: placed in Destiny Zone above Bazaar.

4.7 Deactivation

Deactivated card = face-down. Cannot use effects or attack. Targeting a face-down card for deactivation again = discard instead. Sleep Potion can place Creatures face-down intentionally to hide identity.

5. File Structure

index.html (board + modals) | cardData.js (card array + keywordsMap) | script.js (~3050 lines, all game logic) | styles.css | FUTORY_PLAN.md/pdf | assets/cards/ (Unity art, PNG slugified) | assets/QuickStartRulesWeb.pdf

6. Implementation Status — Core Systems

System	Status
Bazaar rendering	Done — single-set shows art; multi-set shows card name
Card purchasing / auto-pay	Done — pays leftmost valid Steams from hand
Phase progression (Spacebar)	Done
Turn rotation 2–4 players	Done — pass-device overlay
Hand limit + discard enforcement	Done — blocks End Turn until compliant
Combat (attack / block / direct)	Done — single creature can block
Spillover damage	Done
Artifact play in defense	Done — multi-artifact selection
Future/History cycling	Done — auto-reshuffle with animation
Summoning sickness	Done
Game over / win detection	BUG: winnerText undefined, should be winnerTitle
Destiny trigger system	Not started
Deactivation (face-down)	Not started
Defender creature choice	BUG: always picks first creature in zone
Permanent Destiny zone HUD	Not started

6.2 Unity Card Effects

Landmarks

Card	#	Status	Notes
Pandorama	001	Done	Hand limit +2
Fountain of Youth	002	Done	+1 TP when skipping Steam Phase
Dragura's Wasteland	003	Pending	Discard FireSteam → heal all damage from a Creature
Planetarium	004	Pending	Description missing from cardData — needs entry
Laser Catalyst	005	Pending	End Phase: discard LaserSteams → deal 1 dmg each; Artifacts can't respond
Lethargo's Temple	006	Partial	Bazaar dimming works; TP-as-currency payment not implemented
Clone Factory	007	Pending	Creature Phase: discard GoldSteam → attack twice
Aetherlab	008	Bug	Unlocks Steam in Construction — should be trade UI (Fire→Gold or Gold→Laser)

Creatures

Card	#	Status	Notes
Ichor	009	Done	No special effect; 2 HP
Cravus	010	Done	No summoning sickness
Entropy	011	Pending	Attack: roll die, 6 possible outcomes
Meridius	012	Pending	+1 Str per opponent Landmark; unblockable if opponent has >=3
Meridia	013	Partial	HP scales with Artifacts in History; sacrifice-to-prevent not implemented
Time Thief	014	Pending	Gain TP equal to damage dealt
Rampadon	015	Done	No summoning sickness + unblockable
Vulcanem	016	Done	No special effect; 6 HP tank

Artifacts

Card	#	Status	Notes
Smoke	017	Done	-1 Str to all attackers per Smoke played; stackable
Dark Matter	018	Pending	Draw card; target player: sacrifice Creature / discard / lose 2 TP
Reflector	019	Pending	Redirect attack to player of choice
Talisman	020	Pending	Prevent card targeting you; Creature/Artifact→History, Spark→Abyss

Sparks

Card	#	Status	Notes
Reversal	021	Pending	Take card from History Pile to Hand
Faith	022	Pending	Draw a card; gain 3 TP
Threat	023	Pending	Send Landmark to Abyss unless owner pays 2 TP per Landmark
Confiscation	024	Pending	Look at opponent's hand; take one card

Destiny Cards (025–048) — trigger system not yet built

Card	#	Type	Notes
Healing Tree	025	Instant	Players discard any cards → gain equal TP
Freeze	026	Semi-perm	Turn ends; draw only 1 in End Phase (need flag)
Dragon Throne	027	Instant	Take random card from an opponent's hand
Unstoppable Force	028	Instant	Creatures +1 Str, unblockable; opponents can't use Artifacts this turn

Truce	029	Instant	Your Creatures can't attack this turn
Voider	030	Instant	Each player may send up to 2 cards from History to Abyss
Space Voider	031	Instant	Up to 4 from History to Abyss
Eternal Hour	032	Instant	All players tied for most TP lose 4
Great Flood	033	Instant	Each player sends one Landmark to Abyss
Laser Bomb	034	Instant	All Creatures in Creature Zones → Abyss
Daredevil's Reward	035	Instant	Players tied for least TP: show card from hand → take same from Bazaar
Lethargo's Approach	036	Instant	Each player loses 1 TP
Sacrifice	037	Instant	Roll Futury Die; lose that many TP
Break of Dawn	038	Instant	Roll Futury Die; gain that many TP
Sandstorm	039	Semi-perm	All Landmarks deactivated; once per Construction reactivate 1
Wormhole	040	Instant	Everyone shuffles all zones → new Future Pile; draw 3
Dragura's Command	041	Instant	Each player discards 1 card from hand
Rula's Support	042	Instant	Each player draws 1 card
Contermination	043	Semi-perm	Turn a non-Steam Bazaar pile face-down (inaccessible)
Noctura's Night	044	Semi-perm	Each player removes their Day Die
Sunken City	045	Instant	Each player may take 1 card from History to Hand
Kyro's Destiny	046	Instant	Play a Spark of your choice from Bazaar
Chrono Machine	047	Instant	Active player gets an extra turn
Meridia's Revenge	048	Instant	Deal 1 dmg per Artifact in target's History; Artifacts can't respond

7. Known Bugs (Confirmed)

#	Location	Bug	Fix
1	script.js ~1510	`winnerText` undefined; should be `winnerTitle`	Rename variable
2	script.js ~717	`getBaseStrength()` uses <code>parseInt(card.cost)</code> — costs separates (dead FCG) or baseHealth	Use <code>parseInt(card.FCG)</code>
3	script.js ~2040	Blocker always picks <code>availableCreatures[0]</code> ; no defender choice	Add choice selection UI
4	script.js ~1295	Aetherlab: allows Steam buying during Construction Phase	Replace with trade UI
5	script.js ~1237	Lethargo's: <code>canAfford</code> returns true for everything (too cheap)	Check SP availability: F=1, G=2, L=3

8. Pending Work — Priority Order

P1 — Unity Game Completion

- Fix `winnerText` → `winnerTitle` bug
- Fix defender creature choice (show selection UI when multiple creatures available)
- Implement Destiny trigger system (turn start, Future Pile = 0)
- Implement deactivation state (face-down visual toggle)
- Implement remaining Unity card effects (see tables above)
- Fix Aetherlab to be a proper trade mechanic
- Fix Lethargo's Temple TP-as-currency payment UI

P2 — Duality Integration (when Unity is stable)

- Confirm Duality card costs (many are blank — pending balancing by Simon)
- Add Duality card images as produced

- Chrona: Strength/Resistance split (redistribute HP between Attack and Defense on entry)
- Lotus: Extra Creature slot as Artifact placement
- Hand of Rhone: Direction + range-based area damage mechanic
- Hyperscope: Direct-target Landmark destruction
- Sleep Potion: Intentional face-down creature summoning

P3 — Polish

- Stats panel
- Permanent Destiny card HUD
- Multi-pile Destiny mechanic (Pathways)
- Automated rule enforcement mode

9. Design Notes & Clarifications (from Simon Allmer)

- Single creature stat: All creatures use one HP value as both attack and defense. Chrona (Duality 057) is the sole exception — splits HP into Strength and Resistance on entry.
- Creatures are not permanent attackers: Every attacking creature goes to History after combat regardless of outcome. Intentional — they cycle back through Future Pile.
- Blocking is optional: Defender always chooses. If Lotus gives multiple creatures, defender picks which one blocks.
- FireSteam is the only free card — no other card has zero cost.
- Steam purchase limit: 1 per turn. Cannot buy FireSteam then use it to buy GoldSteam in the same turn.
- Aetherlab: Trade mechanic — Construction Phase only. Pay 1 Steam from hand, take next tier from Bazaar to hand. Traded Steam returns to its Bazaar pile.
- Fountain of Youth: Simplified — skip Steam Phase = +1 TP. Only draw-3 scenario currently.
- Deactivation = card turns face-down. Targeting a face-down card for deactivation = discard it instead.
- Destiny trigger: Checked at the very start of turn (before phases), only if Future Pile is exactly 0. Shuffle happens only when drawing.
- Duality costs: TBD — focus on Unity first. Costs provided when balancing is complete.
- Duality images: Will be added over time as produced.
